

# New York City

Five policy cases mapped to Doughnut dimensions. Native outcomes remain separate; no synthetic impact score.

Equal ring segments show case coverage only, not direction, magnitude, or threshold attainment.

| POLICY / OUTCOME GEOGRAPHY | DOUGHNUT MAPPING | NATIVE-UNIT HEADLINE | EVIDENCE DESIGN |
|---|---|---|---|
| **1. Universal school meals**<br>NYC public-school system | Food; Education | **+5.4 pp**<br>Lunch participation, poor middle-school students<br>2010-2013 exposure; not 2017 citywide effect | **Quasi-experimental**<br>Conditional on design assumptions |
| **2. Tenant Right to Counsel**<br>Targeted NYC ZIP-code rollout | Housing; Peace & Justice; Social Equity | **-1.0 pp**<br>Eviction probability across housing-court cases<br>2016-2019 rollout; not the -8.4 pp counsel LATE | **Quasi-experimental**<br>Conditional on design assumptions |
| **3. Clean Heat oil phaseout**<br>NYC buildings / census tracts | Air Pollution; Health | **-0.12 µg/m³**<br>PM2.5 per 10 converted buildings per tract<br>2011-2016; adjusted association, not citywide effect | **Adjusted observational**<br>Not an identified policy effect |
| **4. Congestion Relief Zone**<br>Manhattan cordon / regional network | Networks*; Air Pollution; Income & Work | **+11% speed**<br>Cordon-area speed vs synthetic counterfactual<br>2025 rollout; August 2026 working-paper revision | **Quasi-experimental; air contested**<br>Conditional on design assumptions |
| **5. Paid sick leave**<br>NYC / adult Medicaid cohort | Health; Income & Work | **-0.6 pp**<br>Annual probability of emergency care<br>2011-2017; sensitive to statistical specification | **Quasi-experimental association**<br>Conditional on design assumptions |

pp = percentage points. *Networks is a conceptual mobility link; the repository broadband indicator was not evaluated. Air results disagree across endpoints/designs. Early estimates do not establish current implementation performance.

# Santa Cruz, California

Five policy cases mapped to Doughnut dimensions. Native outcomes remain separate; no synthetic impact score.

Equal ring segments show case coverage only, not direction, magnitude, or threshold attainment.

| POLICY / OUTCOME GEOGRAPHY | DOUGHNUT MAPPING | NATIVE-UNIT HEADLINE | EVIDENCE DESIGN |
|---|---|---|---|
| **1. Drought water rationing**<br>City Water service area, not city boundary | Water & Sanitation; Freshwater Withdrawals | **26% savings**<br>Average monthly water-use savings<br>Jun-Nov 2014 vs same months 2013; not causal | **Descriptive before-after**<br>Not an identified policy effect |
| **2. ADU permitting reform**<br>Unincorporated county; excludes city | Housing | **28 → 103**<br>Annual ADU permits issued<br>2017 → 2024; permits, not completed homes | **Administrative output**<br>Not an identified policy effect |
| **3. Youth Cruz Free**<br>Santa Cruz METRO, regional authority | Networks*; Education; Income & Work; Climate* | **31% = 86/280**<br>Respondents reporting they started riding<br>2024 retrospective survey; not ridership growth | **Descriptive survey**<br>Not an identified policy effect |
| **4. Food-scrap separation**<br>City solid-waste collection customers | Climate*; Nitrogen & Phosphorus* | **≈40 tons/week**<br>Food waste reported diverted from landfill<br>City 2023 report; no measured net emissions | **Operational throughput**<br>Not an identified policy effect |
| **5. Community-choice energy**<br>3CE regional supplier, not city outcome | Energy; Climate Change | **551 vs 384**<br>lbCO2e/MWh: 3CE total vs CA utility average<br>2025 total-scope accounting; higher intensity | **Accounting + modeled tariffs**<br>Not an identified policy effect |
